HOOF RESCUE FOR EQUINE

UNLOCK OPTIMAL HOOF DEVELOPMENT

STRONG
GROWTH

PROTECTS
HOOVES

ESSENTIAL
MINERALS

**APPLE
FLAVOUR**

Hoof Rescue is the ultimate mineral supplement formulated with a precise blend of essential minerals including chelated manganese, chelated cooper and zinc, along with vital nutrients like biotin and amino acids and dietary nucleotides.

FEATURES:

- Supports new hoof development
- Full of Essential Amino Acids (32%) including Lysine and Methionine
- Helps naturally balance out mineral imbalances in the diet
- 38% Crude Protein and 5% Crude Fat

Hoof Rescue is essential for healthy hooves, skin and hair, especially in horses and ponies with soft or brittle hooves.

With apple flavouring to increase palatability, **Hoof Rescue** supports optimal hoof development for stronger, healthier hooves.

USAGE

- Feed 25g or one scoop (supplied) per 500kg horse per day. Mix in with wet or dry feed.
- For optimal results, supplement biotin for at least 4-8 months, as it primarily affects new hoof growth.

INGREDIENTS:

SCI Protein, Chelated Manganese, Biotin, Zinc Propionate, Beta Glucans, Chelated Copper and Flavouring.

STORAGE

Store in a dry place.
