CLEVER by NATURE

Optimate | HOOF RESCUE HELPS WITH

- Myco-toxin binding for animal health and balancing rumen PH. Acidosis can contribute to laminitis.
- Reduced foot health problems and strengthen building blocks of hoof walls.
- Stimulates keratin production, the main structural element in hair and hooves.

WHY USE Optimate | HOOF RESCUE?

- **Optimate Hoof Rescue** includes Zinc Methionine making the Zinc more readily available for absorption through the gastrointestinal tract.
- **Optimate Hoof Rescue** includes Chromium Methionine, Chromium is necessary to optimize the activation of insulin receptor so that more glucose can get into the cell.
- **Optimate Hoof Rescue** includes Biotin, Biotin is B-group vitamin and plays a key role in synthesis of glucose, protein and fat. Biotin is necessary for synthesis of keratin, a hard structural protein in horns and hoofs.

HEALTH AND SAFETY

Material safety data sheets are available on request.
