PERMA GRO[®]

MARINE[™]

A RANGE OF SLOW RELEASE
FERTILISERS THAT **IMPROVE**
PLANT & SOIL PERFORMANCE

SOIL
HEALTH

PLANT GROWTH
& NUTRIENTS

ABIOTIC STRESS

PERMAGRO[®]MARINE[™] is a premium zeolite based range of slow release fertilisers that are packed with nutrients to ensure the success of any planting or soil improvement program.

Primary sectors:

- Agriculture
- Viticulture
- Horticulture
- Lawn & Turf

Zeolite improves the CEC of the soil, slow releases nutrients to the plant roots and features enhanced moisture management by retaining moisture and improving soil aeration and drainage.

FEATURES:

- Permanent solution for improving soils
- Slow release nutrients
- Improves moisture retention
- Reduces nitrate leaching
- Three nutrient solutions
- Fine and Coarse options

TYPICAL ANALYSIS %w/v	N	P	K	S	
PERMAGRO [®] MARINE ORGANIC [™]	Fine	Fish & Seaweed Extracts			
	Coarse	Fish & Seaweed Extracts			
PERMAGRO [®] MARINE VINE [™]	Fine	0.2	1	2	0.5
	Coarse	0.3	1.4	3	0.6
PERMAGRO [®] MARINE NPKS [™]	Fine	2	0.8	1.6	0.2
	Coarse	3	1	2	0.3
MARINE VINE [™] & NPKS [™] contains Fulvic, Fish & Seaweed					

PERMAGRO®MARINE™ are permanent solutions and do not break down in the soil.

Once the bound nutrients are released, **PERMAGRO®MARINE™** continues to bind and release positive cations, improve the physical properties of soil and manage moisture retention.

PERMAGRO®MARINE™ offers three solutions for your application:

PERMAGRO®MARINE ORGANIC™ a high quality organic fertiliser that is designed to provide essential nutrients to crops and plants using a combination of fish and seaweed compounds.

PERMAGRO®MARINE VINE™ is a high-quality fertiliser for viticulturalists and horticulturalists to manage nutrient delivery at a time when nitrogen impact on leaf growth and fruit quality is less than desirable.

PERMAGRO®MARINE NPKS™ a premium high quality fertiliser that combines the best of both worlds - synthetic and organic compounds.

Easy Application:

PERMAGRO®MARINE™ can be applied by hand or tow behind spreader. The product runs freely and doesn't bridge out. Easy to use for small and medium land holders. Accurately calibrate and distribute.

PERMAGRO®MARINE™ can be applied in wet weather or when foliar fertiliser application is not possible.

Fine - Not suitable for a hand spreader due to dusting effect of fine particle. Use a tow behind for dusting the target area or as a mix to substrates. Fine option migrates into the soil profile once watered in.

Coarse - Suitable for hand and tow behind spreaders. The small chip size migrates into the soil profile under the leaf once watered in.

The benefits are economically clear:

PERMAGRO®MARINE™ offers a number of benefits for plant growth and soil quality. Here are some of the key benefits:

- **Improved Water Retention:** **PERMAGRO®MARINE™** improves water retention in the soil, reducing water loss and increasing plant hydration.
- **Enhanced CEC and Nutrient Availability:** The loaded zeolite improves the CEC of the soil and provides essential nutrients to plants, promoting healthy growth and development while limiting nitrate leaching.
- **Increased Soil Porosity:** The zeolite particles in **PERMAGRO®MARINE™** create tiny pores in the soil, promoting aeration and improving soil structure.
- **Improved Soil Fertility:** The addition of organic matter and nutrients to the soil enhances soil fertility, promoting healthy plant growth.

USAGE

TYPICAL CROPS	GRADE	RATE	APPLICATION NOTES
Agriculture	Fine	80-130kg/Ha	Apply 1 - 2 times during spring and autumn
	Coarse	70-90kg/Ha	
Horticulture	Fine	100-150kg/Ha	Apply 1 - 2 times early in the growing season prior to fruit set and 30 days prior to harvesting
	Coarse	75-110kg/Ha	
Commercial Turf	Fine	100-150kg/Ha	Apply 1 - 2 times during spring and autumn
	Coarse	75-110kg/Ha	
Residential Lawns	Fine	Not Recommended	Apply 1 - 2 times during spring and autumn
	Coarse	100g/m2
